Re: Luxor Industrial Corporation  
File No: 82-822

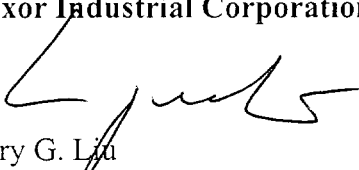

Dear Sir or Madam:

We enclose the following for your information and records:

- Quarterly Report for filing of Form 51 - 901F dated 6/30/02
- News Release dated 7/10/02
- News Release dated 7/23/02
- News Release dated 8/12/02
- Insider Report for Terry O. Lashman dated 6/7/02
- Insider Report for Terry O. Lashman dated 6/14/02
- Insider Report for Terry O. Lashman dated 6/19/02
- Insider Report for Terry O. Lashman dated 7/17/02
- Insider Report for Terry O. Lashman dated 8/2/02
- Insider Report for Terry O. Lashman dated 8/21/02
- Insider Report for Terry O. Lashman dated 9/5/02

We trust you will find the enclosures in order.

Luxor Industrial Corporation

FORM 51 - 901F

QUARTERLY REPORT

INCORPORATED AS PART OF:

- Schedule A
- Schedule B
- Schedule C

ISSUER DETAILS:

NAME OF ISSUER: Luxor Industrial Corporation

ISSUER'S ADDRESS: 702 - 889 West Pender Street

CITY: Vancouver

PROVINCE: British Columbia

POSTAL CODE: V6C 3B2

ISSUER TELEPHONE: (604) 684-7929

ISSUER FACSIMILE: (604) 683-2003

CONTACT PERSON: Terry O. Lashman

CONTACTS POSITION: President

CONTACT TELEPHONE: (604) 684-7929

FOR QUARTER ENDED: June 30, 2002

DATE OF REPORT: August 26, 2002

CERTIFICATE:

The schedule(s) required to complete this Quarterly Report are attached and the disclosure contained therein has been approved by the Board of Directors. A copy of this Quarterly Report will be provided to any shareholder who requests it. Please note this form is incorporated as part of both the required filing of Schedule A and Schedules B & C.

**LUXOR INDUSTRIAL CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**JUNE 30, 2002**

**1. Nature of Operations**

These financial statements have been prepared on a going concern basis, which assumes that the company will be able to realize its assets and discharge its liabilities in the normal course of business.

The continuing operations of the company are dependent upon its ability to generate profitable operations in the future or to obtain additional funding from other sources.

J.E.J. Holdings Inc., the Company's wholly owned subsidiary, ("JEJ") holds an exclusive worldwide license under patent applications and any resulting patents in the United States of America and Canada, to manufacture, market and distribute a patented engineered bridging system utilized in the building construction industry. JEJ has licensed the North American rights to Western Interlok Systems Ltd.

Western Interlok Systems Ltd., the Company's 100% voting controlled subsidiary, ("WIS") manufactures and distributes a patented engineered bridging system. These products are distributed to building material distributors located in Canada and the United States of America. During the years ended December 31, 1996, 1997, and 1998 the company obtained Canadian and U.S. certification of its brace-bridging system.

Eastern Brake Alert Systems Ltd., a 75% owned subsidiary of the Company, ("EBAS") has acquired the North American manufacturing and marketing rights for an air-brake warning system for the trucking industry. The system monitors the air-brake system and sends a signal to the driver when a problem in the brake system is identified. This system is still in the development stage. There were no expenditures made in the current period.

**2. Significant Accounting Policies**

**a) Consolidation**

The consolidated financial statements include the accounts of the company and its subsidiaries. As at end of the period, the company's subsidiaries and its percentage equity interest in each are as follows:

J.E.J. Holdings Inc.	100%
Western Interlok Systems Ltd.	100% voting controlled
Eastern Brake Alert Systems Ltd.	75%

**b) Marketable securities**

Marketable securities are recorded at cost. Market value at the end of the period is \$60 (2001 - \$88).

**c) Inventory**

Raw materials are valued at the lower of cost and replacement cost. Work in process and finished goods are valued at the lower of cost and net realizable value. Cost for all inventory is determined on the first-in, first-out method which, for work in process and finished goods, includes the cost of material, direct labour, utilities and freight. Other manufacturing overhead has not been applied because it is not considered material.

**d) Loss per share**

Loss per share has been calculated using the weighted average number of shares issued during the period. Fully diluted per share information is calculated as if all warrants and options outstanding at the end of the period were converted at the later of the beginning of the year or the date of issuance. The weighted average number of shares outstanding is 18,281,034 (2001 - 17,843,534). Diluted loss per share has not been provided for the first half of 2002 and 2001 as it would be anti-dilutive.

**e) Share issue costs**

Costs associated with the issuance of share capital are charged directly to share capital.

#### f) Foreign currency translation

All foreign currency transactions are related to the United States. At the end of the period, monetary assets and liabilities resulting from foreign currency transactions are translated into Canadian dollars at 1.50 per US dollar (2001 – 1.50). Revenue and expense items, excepting amortization, are also translated at 1.50 per US dollar (2001 – 1.50).

#### g) Research and development expenditures

Certain of the expenditures of WIS related to the development and certification of the company's improved brace-bridging system have been deferred. These deferred costs are being amortized to operations over 15 years.

#### h) License and patent costs

License and patent costs relate to the cost of the license and related patent costs for the brace-bridging system. These costs are being amortized to operations over 15 years.

#### i) Financial instruments

The company's financial instruments consist of cash, marketable securities, accounts receivable, accounts payable and advances from related parties. Unless otherwise noted, it is management's opinion that the company is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair value of these financial instruments approximate their carrying values, unless otherwise noted.

#### j) Estimates

The preparation of financial statements in conformity with generally accepted accounting principals requires management to make estimates and assumptions that affect the reported amount of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

#### k) Capital assets

Capital assets are recorded at cost less accumulated amortization. Amortization is provided using the declining-balance method at the rate of 20% for furniture and equipment, 30% for automobile and the straight-line method over the remaining term of the lease for leasehold improvements.

#### l) Income taxes

Income taxes are accounted for using the future income tax method. Tax benefits have not been recorded due to uncertainty regarding their utilization.

#### m) Stock-based compensation

The company has approved purchase options which are detailed in note 6. No compensation expense is recognized for this plan when shares or share purchase options are issued. Any consideration paid on the exercise of share purchase options or purchase of shares is credited to share capital. If stock or stock options are repurchased, the excess of the consideration paid over the carrying amount of the stock or stock option cancelled is charged to deficit.

### 3. Capital Assets

	2002			2001
	Cost	Accumulated Amortization	Net Value	Net Value
Furniture and equipment	\$ 88,791	\$ 57,815	\$ 30,976	\$ 34,956
Leasehold improvements	33,726	33,726	-	540
Automobile	6,000	4,870	1,130	1,585
License and patents	141,148	46,273	94,875	97,611
	\$ 269,665	\$ 142,684	\$ 126,981	\$ 134,692

#### 4. Research and Development Expenditures

	2002	2001
Balance, beginning of year	\$ 534,546	\$ 583,141
Less: amortization	28,087	28,087
Balance, end of the period	\$ 506,459	\$ 555,054

#### 5. Advances To / From Related Parties

Advances to or from directors and companies controlled by directors are unsecured and have no specific terms of repayment.

#### 6. Share Capital

##### a) Authorized Capital

99,588,750 common shares without par value

##### b) Issued Capital

	2002		2001	
	Shares	Amount	Shares	Amount
Balance, beginning of year	18,281,034	\$9,114,340	18,054,784	\$8,859,340
Issued for cash:				
• Private Placement				
• Options			200,000	80,000
Return Escrow to treasury			-411,250	-
Balance, end of the period	18,281,034	\$9,114,340	17,843,534	\$8,839,340

##### c) Securities issued during the period

Date	Common	Price	Proceeds	Type	Consideration	Commissions
Nil						

##### d) Stock options plan

The company has reserved shares for issuance under its stock option plan. The plan provides for the granting of stock options to directors, officers and eligible employees at the fair market value of the Company's stock at the grant date. Options were granted during the period are as follows:

Date Granted	No. Of Shares	Price	Expiry Date
Nil			

##### e) Warrants and options outstanding

Description	No. Of Shares	Price	Expiry Date
Series "A" share purchase warrants*	420,000	\$0.75	Aug 1, 2002
Series "A" share purchase warrants*	437,500	\$0.50	Jul 17, 2003
Director and employees stock options	300,000	\$0.40	Mar19, 2006

\*Non-transferable warrants are outstanding. Each warrant entitles the holder to purchase an additional share, generally for a two year period from time of issue.

##### f) Shares held in escrow

As at the end of the period, 245,000 shares are held in escrow. Their release is subject to determination by regulatory authorities.

## 7. Commitment

The company has agreed to pay a 6% royalty on sales of the brace-bridging system and a 5% royalty on sales of the air-brake warning system to an inventor who is also a director of the company.

## 8. Related Party Transactions

- a) During the period, the company paid management fees of \$24,000 (2001 - \$24,000) to a company controlled by a director of the company.
- b) During the period, the company reimbursed \$67,323 (2001 - \$77,095) for office, rent, and promotional expenses to a company controlled by a director of the company. At the end of the period, \$100,928 (2001 - \$39,424) was included in advances from related parties.
- c) During the period, the company paid marketing consulting fees of \$37,500 (2001 - \$37,500) to a company controlled by a director of the company.
- d) During the period, the company reimbursed \$18,676 (2001 - \$20,792) for product promotional expenses to a director. As at the end of the period, \$725 (2001 - 2,719) was included in advances from related parties.
- e) During the period, a company controlled by a director was paid \$24,673 (2001 - \$24,673) for marketing consulting services.
- f) During the period, the company reimbursed \$6,456 (2001 - \$2,007) for product promotional expenses to a director. As at the end of the period, \$1,186 (2001 - 190) was included in advances from related parties.
- g) During the period, the company incurred royalties on the sales of the brace-bridging system of \$26,431 (2001 - \$25,011) (see note 7). As at the end of the period, \$80,807 is payable (2001 - \$24,974).

## 9. Income Taxes

The company has approximately \$5,000,000 of losses available to reduce taxable income of future years. The benefit of these losses has not been recorded in the financial statements.

## 10. Comparative Figures

Certain comparative figures have been reclassified to conform with the presentation adopted in the current year.

**LUXOR INDUSTRIAL CORPORATION**

**QUARTERLY REPORT**

**SIX MONTHS ENDED JUNE 30, 2002**

**MANAGEMENT DISCUSSION**

**Product Sales**

Sales for the quarter ending June 30, 2002 were \$478,400, up 5% compared to \$455,290 for the same period of 2001.

A record \$118,482 of IBS 2000® units were sold in July, 2002.

The overall increased sales pace is a continuation of the growth trend that began in the second half of 2000.

The Company is continuing to pursue its objective of appointing new distributors for its IBS 2000® products in active housing markets throughout the United States. Continuing activities in addition to the selection of distributors, include direct contact with builders, development of collateral materials and design software programs and the procurement of the necessary engineering approvals for both engineered and conventional wood products across North America.

The Company is also pursuing sales in overseas markets as well as sales of other building product lines.

**Product Distribution**

Luxor has 19 distributors. In Canada, Weyerhaeuser Canada Limited in British Columbia and Goodfellow Inc. and Jager Industries Inc. in Ontario. In the United States, Vandermeer Forest Products, Inc. and Hampton Distribution Companies in Washington; International Wood Products and Hampton Distribution Companies in Oregon; Snively Forest Products in Colorado; Dixie Plywood and Snively Forest Products in Texas; Boise Cascade Corporation in Georgia; Mid-State Lumber Corp., Eastern Engineered Wood Products, Holbrook Lumber Company and P&R Truss Co. in the North East, Snively Forest Products, Atlantic Forest Products, Inc., North American Products, Inc. and Universal Forest Products in the mid Atlantic.

**Strategic Alliances**

In March 2002, Trus Joist™, a Weyerhaeuser Business, released version 6.0 of its TJ Beam® design software containing floor performance enhancement factors for Luxor's patented IBS 2000® Load Sharing Connectors™. Luxor has been advised that approximately 12000 copies of the program will be distributed to registered Trus Joist™ designers.

Previously, Trus Joist™ approved Luxor's patented IBS 2000® Load Sharing Connectors™ for use with its TJI® joists. The approval followed an extensive testing program to evaluate the floor performance contribution attained from various floor restraint devices. Luxor's IBS 2000® was the only proprietary product to be approved by Trus Joist™.

The market for Engineered Wood I-Joists has grown to exceed 40% of North America's housing starts. Weyerhaeuser, with the recent purchase of Willamette Industries, has an estimated 55% market share making it the leading supplier within this industry sector. The release of the design software therefore gives Luxor access to a market opportunity that is approximately 2.5 times greater than the Canadian housing industry.

Luxor is now pursuing specification opportunities for its IBS 2000® Load Sharing Connectors™ with architects, engineers and dealers designing with the Trus Joist™ software as part of its expanded IBS 2000® marketing program. Luxor is continuing to develop product distribution and representation opportunities to achieve more direct contact with builders and designers using engineered and conventional wood joist floor systems.

The Company is in discussions with other major I-Joist manufacturers regarding joint marketing of IBS 2000® and their I-joists.

## **Business Development**

In 2001, Luxor released its IBS 2000® Floor Navigator™ Design Analysis Software. The Floor Navigator™ is Luxor's first public release of its floor analysis program. The Floor Navigator™ program provides floor designers with both structural and performance information required to specify Luxor's patented IBS 2000® Load Sharing Connectors™. The addition of the software program to Luxor's growing list of design tools improves Luxor's ability to demonstrate the capability of its IBS 2000® Connectors to build better floors for less.

All design programs provide structural information. Luxor's Floor Navigator™ program is one of the first in the industry to provide performance as well as structural information. Each floor analysis includes Luxor's Floor Performance Rating that quantifies the performance of different floor joist configurations. This provides designers with the floor's level of performance before it is built. The floor performance rating system has proven to be the most valuable sales tool for IBS 2000®. The ability of the Floor Navigator™ software to provide the Performance Rating as a natural part of the design process will increase the specification of IBS 2000® in floors.

Software has been completed for Boise Cascade Corporation, Louisiana Pacific Corporation and Jager Industries Inc. I-joists as well as for I-joist manufacturers who are Members of the American Plywood Association. Luxor intends to post updates to the program on its website; [www.luxorcorp.com](http://www.luxorcorp.com).

Sales of the higher value IBS 2000® units for I-joist applications have continued to improve as the result of Luxor's "Value Engineering" program with builders, architects and engineers. The program provides Luxor with the opportunity to demonstrate to floor designers how its IBS 2000® Connectors can meet their floor performance expectations at the lowest cost.

Luxor is currently developing test markets for new and innovative products for the wood frame building envelope. Test installations are expected to commence in the third quarter with marketing to follow in the fourth quarter of 2002. The products will compliment the "Value Engineering" concept that Luxor is presenting to builders.

## **Corporate Outlook**

The Company is proceeding to implement its strategic plan with an emphasis on expanding the sales of its products. The expansion to new markets and the raising of awareness of the IBS2000® product requires significant funding to retain the human resources and produce the required promotional materials. The Company is currently utilizing cash flow from operations to expand distribution. Upon improvement in equity markets, the Company expects to raise the necessary capital to achieve a more rapid rate of sales growth.

Based on sales growth, the Company is confident that the sales of IBS2000® can be increased to the level necessary for the profitable operation of the company.

## **Funding**

Due to the existing state of equity markets, the Company is not planning to raise significant capital in the short term. Other than obligations to related parties, the Company is able to maintain a positive working capital position.

## **Other**

Additional corporate developments are available on the Company's website, [www.luxorcorp.com](http://www.luxorcorp.com).

### Marketing Events in Luxor Industrial Corporation

#### **Luxor Releases IBS 2000® Floor Navigator™ Software for Nordic I-Joists**

**Vancouver, British Columbia...Luxor Completes Floor Navigator™ Software for Nordic Engineered Wood I-Joists.** Nordic, based in Quebec, is one of the largest solid lumber flange I-joist manufacturers in the world with international representation. The Navigator will be used by their in house design staff as well as field representatives to do floor analyses.

**United Kingdom...Luxor Staff Presents IBS 2000® to Timber Frame Manufacturers in England and Scotland.** The presentations were conducted as part of a tour of companies participating in the Total Engineered Floor System (TEFS) promotion. Six of the largest timber frame manufacturers, with a combined capacity of 22,000 homes, met with the group's representatives. The system, including Nordic Joists and IBS 2000®, was well received by the manufacturers.

**Langley, British Columbia...IBS 2000® Used by Veritas Builders Inc. in its 34 Unit Creekside Estates Project.** The system using IBS 2000® and 2 x 12 dimension lumber provided the long spans required for the project at the lowest cost. The project will use approximately 3400 units of IBS 2000® over the next year.

**Chilliwack, British Columbia...HD Construction's Promitory Townhomes Benefit from IBS 2000®.** Repeat IBS 2000® builder, HD Construction, will use the cost saving benefits of IBS 2000® in its 47 unit townhouse project. Lumber joists are being used with IBS 2000® for gains on joist size and spacing.

**Maple, Ontario...IBS 2000® Used by Lakeview Homes.** Lakeview Homes is using the IBS 2000® with 2 x 8 lumber joists at 12" on centre at their Maple Highlands Site. One model has a kitchen area that extends out from the main wall. By utilizing the IBS 2000®, the builder can maintain 2 x 8 joists for these longer spans. Another model has IBS 2000® in the bedroom floor over the double garage.

**Ontario...IBS 2000® Used at New Sites with Wycliffe Homes.** Wycliffe Homes is using the IBS 2000® for long span areas at their Wyldwood Projects in Aurora. They are also using the IBS 2000® at their Richard Crossing Site in Richmond Hill.

**Ontario...Legend Creek Homes and Senator Homes Joins Growing List of Builders Using IBS 2000®.** Legend Creek Homes is using the IBS 2000® with Jager's JSI I-Joists at their Brownstones Site in Oakville. The second floors of certain townhouses have 22'-0" clear spans. The use of IBS 2000® was the only solution to maintain the same I-Joist depth and building height as the other units which had 20'-0" spans. Senator Homes are using the IBS 2000® at their Georgetown Site in Georgetown.

**London, Ontario...IBS 2000® Showcased at the COPP Buildall Contractor Night.** COPP is an ILDC member with four stores in London. There was very good response to the product from the builders, contractors and renovators.

## Luxor Expands Sales of its Patented IBS 2000® to the UK Market

Luxor Industrial Corporation is pleased to announce it has completed the first sale of its patented IBS 2000® Load Sharing Connectors™ to the United Kingdom market. 1,092 IBS 2000® units were sold to Midland Timber Engineering Limited (MTE). MTE, a timber frame manufacturer, are located in Leicester in central England and were visited during Luxor's UK market trip in May, 2002. The IBS 2000® units are part of the Total Engineered Floor System (TEFS) that has been specified in the construction of 39 apartment flats for a major UK builder. The IBS 2000® product will be used in conjunction with Engineered Wood I-joists.

The market size for timber frame kit housing in the UK is approximately 25,000 units annually representing 20% of the housing market. Unlike North American construction, timber frame homes are manufactured for builders as prefabricated kits that include floors, walls and roof assemblies.

Luxor sees itself as well positioned to grow in the UK timber frame market. It has price and performance advantages as part of the TEFS marketing initiative, as well as direct contact with the builders and timber frame kit manufacturers. In addition, changes in the British building code that address vibration in floors contribute to the positive outlook. IBS 2000® has been specified in the floor design of other pending UK based projects. Luxor plans to maintain an inventory of its IBS 2000® Connectors in the UK to service the growing timber frame manufacturing industry.

*Luxor has spent many years in Research and Development, analyzing wood-frame floor construction, while establishing itself as a leading authority in wood floor performance engineering in North America. Luxor has developed the IBS 2000® Connectors. Luxor markets, manufactures, and distributes the IBS 2000® Load Sharing Connectors™.*

For further information contact Terry Lashman at (800) 665-2454 or (604) 684-7929, or visit Luxor's website at [www.luxorcorp.com](http://www.luxorcorp.com).

### **Luxor Achieves Record IBS 2000® Sales in July**

Luxor Industrial Corporation is pleased to announce record sales for the month of July of \$118,482 for its patented IBS 2000® Load Sharing Connectors™. Sales in July also represented the largest number of IBS 2000® units sold in any one month.

The record sales were a result of the Company's ongoing market expansion program. During July, the program contributed increased sales for I-joist applications in Canadian and US markets, the Company's first sale into the United Kingdom and higher sales in western markets.

Sales of the higher value IBS 2000® units for I-joist applications have continued to improve as the result of Luxor's "Value Engineering" program with builders, architects and engineers. The program provides Luxor with the opportunity to demonstrate to floor designers how its IBS 2000® Connectors can meet their floor performance expectations at the lowest cost.

The "Value Engineering" approach has allowed Luxor and its United Kingdom agent, Worldwide Inc., the opportunity to provide better performing floors to UK builders at a lower cost. Luxor shipped its first order to the UK in July for a multifamily apartment project. Luxor's IBS 2000® Joist Connectors have been quoted in numerous new projects slated for the fall of 2002.

Sales growth in western markets is the result of Luxor's ongoing marketing activities with builders. The use of IBS 2000® for cost savings is attracting a growing following among builders in the western markets.

Luxor is currently developing test markets for new and innovative products for the wood frame building envelope. Test installations are expected to commence in August with marketing to follow in the fall of 2002. The products will compliment the "Value Engineering" concept that Luxor is presenting to builders.

*Luxor has spent many years in Research and Development, analyzing wood-frame floor construction, while establishing itself as a leading authority in wood floor performance engineering in North America. Luxor has developed the IBS 2000® Connectors. Luxor markets, manufactures, and distributes the IBS 2000® Load Sharing Connectors™.*
